

\$HATTER WHITEPAPER

Introduction:

Built on the Avalanche blockchain, \$HATTER asks a simple question:

How far will you follow down the rabbit hole?

The initial idea was simple: buy and hold \$HATTER, and you'll earn \$TIME rewards automatically in your wallet.

(3,3)

However, \$HATTER was just the beginning. Our vision is to develop an entire **rewards-based income ecosystem on the Avalanche network** - and we are just getting started.

THE MISSION

The **\$HATTER** team is ambitious and highly motivated, and we want to provide crypto users with the ability to **earn from their favourite Avalanche tokens** in a completely scalable, DeFi manner.

\$HATTER is built on top of the Wonderland finance ecosystem. By enabling holders to earn \$TIME and earn through staking, as well as being exposed to the price action on \$HATTER, **we open new avenues for earning on the Avalanche network.**

What's more - as the **HATTER Rewards Ecosystem** expands, all holders of **\$HATTER** will be airdropped our upcoming governance token. In the future, all tokens (e.g \$JOSEPH) or apps that are launched in the **HATTER Rewards Ecosystem** will serve to fuel our governance token.

With the launch of \$JOSEPH, we showed the **\$HATTER** community the power that an ever-expanding rewards ecosystem on Avalanche can have. Our friends at **TraderJoe** understand our vision, and have recognised the potential of this project.

By empowering crypto users and leveraging the best utility tokens that the AVAX network has to offer, **we aim to build something truly unique on the Avalanche blockchain.**

THE TEAM

The **Hatter** team is composed of a small number of well-experienced, highly motivated individuals with a passion for the **Avalanche network** and passive earning systems (3,3).

We saw an opportunity to develop a rewards token ecosystem on the Avalanche network and knew that we could **develop something far beyond what had been done before**. Inspired by the legendary work of the Wonderland Finance team, we aim to provide *smart earning solutions* to all our holders.

The team comes from a background of working in Web3 development and blockchain technology, as well as members with experience in the business development and financial sectors.

ROADMAP PT.2

Phase 3

- Continued expansion of the **HATTER Rewards Ecosystem** tokens, including airdrops for all long-term holders
- High profile influencers campaign
- Updated website and rewards dashboard released
- Further team expansion
- Previews released for the **Hatter Rewards Ecosystem 2022**

More details on Phase 3 will be announced as the **\$HATTER** journey develops.

This is only the beginning. You might ask, *have we gone mad?*

I'm afraid so. But I'll tell you a secret. All the best people are. (3,3)
